> Sketch > Unity

EXPERIENCE

TICKETMASTER
Software Engineering Intern | Summer 2017

Event Details Page (EDP) team. Worked on both frontend and backend web development using React ES6 and Java. Performed a PoC for EDP 1.5 which supports server side rendering with GraphQL and Apollo for a more meaningful user first byte.

CREATIVE LABS
Partnerships Director | Winter 2017 - Present

Established connections with various startups at both UCLA and the surrounding Silicon Beach area. Organized local fireside talks for students who are interested in fields ranging from engineering to design.

MENTORSEAS
Web Director | Fall 2017 - Present

Constructed the new MentorSEAS website with React and Flow and helped revive the organization along with the rest of staff. Worked with the Dean of the engineering department to engage engineering students at UCLA and created ways to increase retention and establish a supportive atmosphere for both male and female students.

COMMUNITY SERVICE COMMISSION
Web Director | Fall 2015 - Present

Led 38 of the largest service organizations on UCLA campus to secure funding and resources. Helped organizations advance their technological presence.

PROJECTS

ONE CLICK PURCHASE
First Place - Ticketmaster Summer Hackathon 2017

Created a React web application that uses multiple Ticketmaster API's (Discovery, Seat Search, Commerce) to provide a one click purchase option for a user.

CAPTAIN MARVEL
Disney API Award - LA Hacks 2016

Facebook messenger chat bot that uses Marvel API to respond to a user's questions about the Marvel universe. Uses wit.ai for natural language processing and Node.js for web application.

MENTORSEAS WEBSITE
Independent Project

The new website for mentorSEAS at UCLA built completely on React. Encompasses an interactive user interface that addresses concerns for mentors and mentees.
